

MILFORD EXEMPTED VILLAGE SCHOOL DISTRICT
BUILDING AND GROUNDS AGENDA
July 14, 2020

In Attendance: Jeff Johnson, Nancy House, John Speiser, Andrea Brady, Chris Hamm, Dave Meranda, Doug Palmer, Judd Phillips, Sandra (?)

1. Transportation:

Parent questionnaire to be going out to collect data to better plan on what percentage of students will be requiring bus service. With the additional changes to building start times, as well as the combining of routes for private school transportation, more buses and drivers are available for 3rd tier routes if needed.

With the help of Doug Palmer, the following was learned:

Once a student is ruled impractical, they will remain so. Yearly, only new students will have to be assessed.

Who you offer busing on the first day of school, you can not take away busing eligibility. But you can declare a route impractical mid year.

A student can be removed from a route after two weeks of non-ridership. They will have to re-request busing, and wait the appropriate time for planning.

2. Summer Projects:

The Bleacher project is complete and installed and it looks good. Wood floors have been refinished and building cleans are on schedule.

The Roof project is slightly behind due to weather delays, but will be back on schedule soon. McCormick Elementary is done with shingles.

The HVAC project at the HS Natatorium was delayed due to the HVAC units arriving a week behind schedule.

3. Reopening Plan

Opening date remains August 24th. A questionnaire is being collected to make the final planning for re-opening. The board will need to approve the choice given to parents to have their student attend school in person in the building, or via an online option. Once a student is placed online, they will remain online for the semester. July 29th is the deadline for parent submissions. Buildings will contact those families who have not responded by August 4th.

There has been an increase in cleaning as well as upgrading to the filtration systems.

Mandatory face masks for employees and students K-12 within 6 feet indoors.

Buildings are working on adjusted schedules to allow for smaller groups in the cafe and playground areas. Student drop off and pick up plans will be adjusted so that parents remain in their vehicles.

Transportation is making adjustments as well to meet CDC guidelines of assigned seating, and loading the bus from the back row to front row.
